***Response to Arguments***

Applicant's arguments, filed 1/16/08, with respect to the rejection(s) of claim(s) os claims 1-37 under 112 2<sup>nd</sup> paragraph have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection follows.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33-37 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious US 3,126,011('011) at Col.1 or alternatively over US 3,577,997 ('997) at noted in the abstract. '011 and '997 disclose a tobacco having a reduced PAH.

Art Unit: 1791

It is noted that the rejected claims are product by process claim. While the claimed product may be produced by a different method than recited by applicant's claims, it is deemed that the end product is not structurally distinguishable from that of applied references. Hence, the applied references anticipate the claimed invention or in the event any differences can be shown for the product of the product-by-process claims, as opposed to the product taught the applied references, such differences would have been obvious to one of ordinary skill in the art as routine modification of the product in the absence of showing of unexpected results; see also *In re Thorpe*, 227 USPQ 964 (CAFC 1985).
